Heirs: a person who is entitled to the assets / heritage 3. Hidden heritage: the wealth left behind in the form of assets and passive 4. Inheritance: the shift of wealth (rights and obligations) a person to the heirs. According to Hilman Hadikusumah, the term inheritance has two senses / meanings, namely: a. However, an understanding of inheritance law itself cannot be found in the sound of the chapters set in the Civil Code. To find an understanding of the laws of inheritance then we will try to look at some understanding of the law of inheritance given by experts, as follows:  

The law of inheritance according to Vollmar is a wealth transfer in full, which means the transfer of all rights and obligations of people who give or bequeath a legacy to those who receive an inheritance or heirs. The law of inheritance according to Pitlo is a set of regulations governing the law of the wealth because of the death of a person.

In general it can be said that the inheritance law is the law governing the position of wealth and properties of a person after death and set on the ways the transfer of wealth to others.
