2. Discussion

The purpose and goal of this study is to determine the performance of its duties and authority of the Notary is a public official in the execution of their office that does not deviate from its authority and did not violate laws and regulations in force. In providing services to people who are part of the services of a notary is expected to be more concerned at the service of society and not for the benefit of individuals or groups but the community at large in the form of service in the civil law, as well as guarantee the truth of the agreement he made. Therefore, notaries are required to be sensitive, honest, fair and transparent in a agreement in guaranteeing the authenticity of the agreement on him. Notary in carrying out its duties and functions cling to the Notary Code, In the execution of his duty and notary sometimes lack a sense of responsibility because he felt that was desperately needed. Bank they are also not expect too much to get orders from the bank. With many notary order was earning that much anyway so it could pay employees and the operational needs of the notary office. With that much anyway notary order in the economy increased to enable them to buy luxury goods in accordance with her wishes, so as to meet the needs of those classified as an expensive item notary felt dependence with the Bank and they are afraid of losing the trust bank. Banks themselves consider if the notary process fast enough they usually move in another notary. In the Bank itself the employers targeted in the disbursement of credit to the credit disbursement was usually chase time. This is because the debtor was usually also wants the credit disbursement process is faster and the banks themselves are also afraid of losing prospective borrowers. This makes the execution of his duties and make a agreement of credit agreement they are oriented in order to process the agreement so quickly, exclude the precautionary principle.¹¹

Notary responsible for his actions in making authentic act that does not comply with applicable regulations and may only action or act of doing is against the law. Accountability is an attitude or action to bear all the consequences of the actions he did or attitude to bear all the risks or consequences arising out of an act. Notary responsible civil sanctions are also civilly or criminally bear in making the agreement if there are elements of criminal and administrative liability and sanctions are also administratively.

The role of the Notary is in need in the manufacture of authentic agreements, Article 1868 of Civil Law states that: "Authentic agreement is an agreement in the form specified by law OF, made by or in the presence of employees of public ruling for it in a place where the agreement on her."¹²

¹² Act No. 2 of 2014 Position of Notary.
While in chapter one (1) seven (7) of Act No. 30 of 2004 on the notary office states that "Agreement is authentic agreement made by or in the presence of a Notary according to the form and manner in specified in this law. In the execution of his duties and, notary stop or Stop from his position with respect, it is set in Article 8 paragraph (1) UUJN. Furthermore, Article articles above mentioned reasons a notary can stop and Stop that since died, was 65 years old: a stop at his own request, was not able to spiritually and / or physically to perform the duties of office notary continuously over 3 years old, not a civil servant, state officials, lawyers, or hold other positions which by law prohibited from holding concurrent positions for Notary. Sanctions against bank broker currently not decisive, because the bank usually too expensive despite the credit application process there is a game from the broker. Sometimes though there was a game they are still oriented on bail between profit and loss if sold auction although in the process of the existing credit agreement and the game contains elements of a tort of criminal and civil terms. But there is also in the process of filing containing an unlawful act that caused the loss of the bank itself and the banks themselves should report on the actions taken by the broker, but it may be penalized only brokerage internal office with the usual administrative sanction and can also sanction the termination of employment, and if anything too new bank made a report to the police, and

even then rarely occur usually only termination of employment. For any external broker banks in reporting to law enforcement a lot of consideration and also rare when there are criminal elements. They still think about the image and reputation of the bank. Whereas the types of crimes committed against the law of the broker is to a complaint, so based reporting. If there is no police report was unable to process such cases, usually from banks are already budgeted as a reserve to anticipate the cost of damages to reserve funds had been budgeted. Therefore, if the bank reported the fraudulent broker budget funds will grow and swell. The phenomenon is very disturbing external broker for the bank in the process they are many who justify how that data is presented can be realized in the disbursement of loans. They are formal process data such that the data should not be in accordance with the criteria of the bank be processed into data according to the criteria of the bank, even though the data was false does not correspond to reality. Typically also those working with people in the bank to launch the process although it can guarantee the warranty is not conditioning your suits them according to the value of the proposed loan borrowers. People in their own internal condition or broker office so that the loan process can be liquid.

One of the rescue efforts of bad loans at the bank branch Mega takeover holy is the debtor’s assets (foreclosed assets). Selection of loan resolution through AYDA performed based solution is considered best for the bank, in the sense of minimizing the risk of bank losses and / or optimize the benefits and / or advantages (speed up the settlement of non-performing loans / obtain optimal recovery). Procedures for implementing the loan resolution through the acquisition of assets of the debtor made through the following manner:

- Voluntary settlement by the debtor, is done by making an agreement pledging of assets / credit settlement, through the Agreement of Sale and Purchase or Sale and Purchase Agreement
- Mortgage auction via KPKNL / Office of the State through the Minutes of the Auction.
- Takeover process of law / litigation / auction execution via the District Court through the Minutes of the Auction.
Loan resolution through the acquisition of the assets of the debtor is not as easy as imagined and basically not the best alternative in the settlement of loans, considering the costs incurred for foreclosed assets large enough and the time-limit for the bank to take over. Notary role in the implementation of the takeover of assets of the debtor as an alternative to the bank loan resolution is to make the agreements of authentic which is a legitimate right base as a legal basis the shift of a bank guarantee to the debtor owned legally. To carry out the takeover through compensation collateral, agreements are necessary in the interests of the bank and the debtor or the Sale and Purchase Agreements Sale and Purchase Agreement.
