Ratification Process of the Company Law Board in SABH through internet facilities conducted by the Notary Public Notary where sufficient access SABH through AHU-Online Application in order to carry out the process of registration of the Company into a legal entity can cause a variety of legal issues. Legal Issues that may arise in this process, such as Legal requirements that must be met in the process of Ratification of Legal Entities in Electronics, fulfillment factor Accuracy and Validation and Legal Requirements in every Form Input Data Company, and includes also problems settlement and legal protection in case disputes in the process of Legal Liability Endorsement through the SABH.

In the Electronic Transactions as in SABH very difficult to determine a person whose conduct transactions and declares himself as a Notary if the person is competent to perform an Engagement, because the application process that occurs not directly done

¹¹ Article 1, Regulation of the Minister of Justice and Human Rights of the Republic of Indonesia Number 1 of 2016 on the Amendment Regulation of the Minister of Law and Human Rights No. 4 of 2014 About Procedure for Approval of Legal Entities and amendments of the Agreement as well as the submission of such Amendment Notice and Change Data Company.

but through the Media Center are not visible to anyone who conduct such transactions, If proved, the person who does not Proficient Conducting Transactions Law to conduct a transaction, then the Agreement can be canceled. Agreements are considered valid if it meets the four (4) conditions regulated in Article 1320 of the Civil Code, which agreed they were bound themselves, Proficient to make an Engagement, a certain thing and a cause that is kosher. In terms of his legal requirement Proficient agreement to create an Engagement, basically everyone is capable to make Engagements, except pursuant to an Act is that they are not yet adults and those who are under the Assisted Living.

In the legal system, the existence of an archive is as Evidence that could explain the existence of certain information or in other words is as proof against the occurrence of an Event of Law who has certain legal consequences for the rights and obligations of the parties concerned. Likewise, the presence Electronic Archive, although it actually has some specific advantages fact can not be easily captured by the five senses so that the proof strength becomes weak.

Data in Electronic Transactions process as well as applications must be considered Aspect Requirements SABH statute because it is possible that there will be a dispute in the process that is difficult to resolve because the law requirements can not be met.

There are several requirements that must be met Law in the transaction or electronically process, namely:¹² 1) Authenticity, the parties involved in the Electronic Transactions must believe that the authenticity and the communication is received. Authenticity is needed in order to be used as a Means of Verification in court, 2) Integrity, A recipient requires confidence in the integrity of the communication before acting to conduct transactions or certain that the message is not altered. These requirements are also required by law as a Means of Verification, 3) Can not Indisputably (Non-repudiation) became a legal requirement when the sender of a message can not deny that the sender of the message is never sent a message, 4) Written and Signature, the Law requires that the agreement must contain two things, the document written and signed. If the parties enter into a contract online, then the terms in writing and signed should be implemented, and 5) Confidentiality Confidentiality is necessary to protect the property rights to the information. Confidentiality is necessary to prevent access to and use of information that could cause harm to the owner information, such as bank account number.

In the Transaction Data Systems as well as a lot of debate about SABH electronic data such as e-mail used as a Means of Verification in Legal System. HIR in Article 164 and Article 1866 of the Civil Code regulates the Evidence that may be filed in the trial process, namely proof paper, witness evidence, suspicions-conjecture, Recognition and Oath. Based to the article, there is no rule that definitively confirms the electronic data. Legal issues that can arise in SABH process is related to the mechanisms of dispute resolution that may arise in this SABH process. Until now, the absence of a mechanism that is completely adequate in the system of justice in Indonesia. Therefore, the way that must be taken in finding Judicial Settlement if the occurrence of a dispute in the process SABH namely through the discovery of the Law by Judge it based on Act No. 14 of 1970 concerning Judicial Authority that a judge can not adjudicate on Case filed reasons that legislation which have turned out to unclear or incomplete, but the judge

must still hear the Case filed and Judge as Law Enforcement and Justice shall Digging, Following and Understanding the values that live in the community law.
